

Mark Scheme (Results)

November 2018

Pearson Edexcel GCSE (9 – 1)

In Mathematics (1MA1)

Foundation (Non-Calculator) Paper 1F

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

General marking guidance

These notes offer general guidance, but the specific notes for examiners appertaining to individual questions take precedence.

- 1 All candidates must receive the same treatment. Examiners must mark the last candidate in exactly the same way as they mark the first.

Where some judgement is required, mark schemes will provide the principles by which marks will be awarded; exemplification/indicative content will not be exhaustive. When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the response should be sent to review.

- 2 All the marks on the mark scheme are designed to be awarded; mark schemes should be applied positively. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme. If there is a wrong answer (or no answer) indicated on the answer line always check the working in the body of the script (and on any diagrams), and award any marks appropriate from the mark scheme.

Questions where working is not required: In general, the correct answer should be given full marks.

Questions that specifically require working: In general, candidates who do not show working on this type of question will get no marks – full details will be given in the mark scheme for each individual question.

- 3 **Crossed out work**

This should be marked **unless** the candidate has replaced it with an alternative response.

- 4 **Choice of method**

If there is a choice of methods shown, mark the method that leads to the answer given on the answer line.

If no answer appears on the answer line, mark both methods **then award the lower number of marks**.

- 5 **Incorrect method**

If it is clear from the working that the "correct" answer has been obtained from incorrect working, award 0 marks. Send the response to review for your Team Leader to check.

- 6 **Follow through marks**

Follow through marks which involve a single stage calculation can be awarded without working as you can check the answer, but if ambiguous do not award.

Follow through marks which involve more than one stage of calculation can only be awarded on sight of the relevant working, even if it appears obvious that there is only one way you could get the answer given.

7 Ignoring subsequent work

It is appropriate to ignore subsequent work when the additional work does not change the answer in a way that is inappropriate for the question or its context. (eg. an incorrectly cancelled fraction when the unsimplified fraction would gain full marks).

It is not appropriate to ignore subsequent work when the additional work essentially makes the answer incorrect (eg. incorrect algebraic simplification).

8 Probability

Probability answers must be given as a fraction, percentage or decimal. If a candidate gives a decimal equivalent to a probability, this should be written to at least 2 decimal places (unless tenths).

Incorrect notation should lose the accuracy marks, but be awarded any implied method marks.

If a probability fraction is given then cancelled incorrectly, ignore the incorrectly cancelled answer.

9 Linear equations

Unless indicated otherwise in the mark scheme, full marks can be gained if the solution alone is given on the answer line, or otherwise unambiguously identified in working (without contradiction elsewhere). Where the correct solution only is shown substituted, but not identified as the solution, the accuracy mark is lost but any method marks can be awarded (embedded answers).

10 Range of answers

Unless otherwise stated, when an answer is given as a range (e.g 3.5 – 4.2) then this is inclusive of the end points (e.g 3.5, 4.2) and all numbers within the range.

11 Number in brackets after a calculation

Where there is a number in brackets after a calculation E.g. $2 \times 6 (=12)$ then the mark can be awarded **either** for the correct method, implied by the calculation **or** for the correct answer to the calculation.

12 Use of inverted commas

Some numbers in the mark scheme will appear inside inverted commas E.g. "12" \times 50 ; the number in inverted commas cannot be any number – it must come from a correct method or process but the candidate may make an arithmetic error in their working.

13 Word in square brackets

Where a word is used in square brackets E.g. [area] \times 1.5 : the value used for [area] does **not** have to come from a correct method or process but is the value that the candidate believes is the area. If there are any constraints on the value that can be used, details will be given in the mark scheme.

14 Misread

If a candidate misreads a number from the question. Eg. uses 252 instead of 255; method or process marks may be awarded provided the question has not been simplified. Examiners should send any instance of a suspected misread to review.

Guidance on the use of abbreviations within this mark scheme

M	method mark awarded for a correct method or partial method
P	process mark awarded for a correct process as part of a problem solving question
A	accuracy mark (awarded after a correct method or process; if no method or process is seen then full marks for the question are implied but see individual mark schemes for more details)
C	communication mark awarded for a fully correct statement(s) with no contradiction or ambiguity
B	unconditional accuracy mark (no method needed)
oe	or equivalent
cao	correct answer only
ft	follow through (when appropriate as per mark scheme)
sc	special case
dep	dependent (on a previous mark)
indep	independent
awrt	answer which rounds to
isw	ignore subsequent working

Paper: 1MA1/1F				
Question	Answer	Mark	Mark scheme	Additional guidance
1	0.02, 0.152, 0.2, 0.37, 0.4	B1	for correct order	Accept reverse order
2	60	B1	cao	
3	5	B1	cao	
4	8000	B1	cao	
5 (a)	22	B1	cao	Allow alternative correct statements, eg $[7 \times (2 + 3)] = 35$
(b)	8	B1	cao	
(c)	$7 \times (2 + 3) = 35$	B1	for correct placement of brackets	

Paper: 1MA1/1F				
Question	Answer	Mark	Mark scheme	Additional guidance
6	Yes (supported)	<p>P1</p> <p>P1</p> <p>C1</p>	<p>starts process to find the number of tins or meals needed, eg $2 \times \frac{1}{4} (= \frac{2}{4} = \frac{1}{2})$ or $14 \times \frac{1}{4} (= \frac{14}{4} \text{ oe})$ or $2 \times 14 (= 28)$ or $8 \div 2$ or to find the number of meals from 8 tins, eg $8 \div \frac{1}{4} (= 32)$</p> <p>a complete process to find the number of tins needed, eg $14 \times \frac{2}{4} (= 7)$ or $8 \div 2$ and “$\frac{14}{4}$,” OR to find the numbers of meals $8 \div \frac{1}{4} (= 32)$ and $2 \times 14 (= 28)$ or $8 \div \frac{2}{4} (= 16)$</p> <p>‘Yes’ from a comparison of correct values, eg 7 (and 8) or 32 and 28 or 16 (and 14) or $\frac{14}{4}$ and 4</p>	<p>Numbers may be expressed in decimal form</p> <p>Correct working needs to be accompanied by a statement confirming enough food has been bought.</p>
7		<p>M1</p> <p>M1</p> <p>C1</p>	<p>for use of scaling, eg at least one of 12, 5, and 6 or 23 OR for using the representation, eg $\frac{30}{4} (= 7.5)$ or 5.75</p> <p>for subtracting their total number of trees from 30, eg $30 - “23” (= 7)$ OR for subtracting the total number of squares from 7.5, eg $7.5 - “5.75” (= 1.75)$</p> <p>oe</p>	<p>May be seen on diagram.</p> <p>“23” must be from addition of 12, 5 and 6 Award 2 marks for 7 seen provided unambiguous “5.75” must be from addition of correct decimals/fractions</p> <p>May be alternative representations, eg one square + half square + quarter square or squares may be divided into 4 sections. Any orientation acceptable.</p>

Paper: 1MA1/1F				
Question	Answer	Mark	Mark scheme	Additional guidance
8 (a)	-2, -1	B1	cao	<p>Allow without label provided unambiguous; allow if the cross is nearer to (2, 3) than other points.</p> <p>Label not required; allow hand-drawn line. Allow any length provided intention is clear.</p>
(b)	Point at (2, 3)	B1	cao	
(c)	Line drawn	B1	cao	
9	30	M1 A1	$2 \times 9 + 3 \times 4$ cao	May be shown in stages but an intention to add 2×9 and 3×4 must be clear
10	3 and 29 or 13 and 19	M1 A1	<p>for two numbers with a sum of 32, only one of which is prime, eg 5, 27 or 1, 31</p> <p>cao</p>	Do not accept 1 as a prime number.
11 (a)	$\frac{10}{16}$	B1	cao	Accept any equivalent fraction
(b)	$\frac{11}{12}$	M1 A1	<p>for $\frac{10}{12}$</p> <p>OR</p> <p>for using a suitable common denominator other than 12 with at least one of the two fractions correct, eg $\frac{2}{24} + \frac{20}{24}$</p> <p>for $\frac{11}{12}$ oe</p>	

Paper: 1MA1/1F				
Question	Answer	Mark	Mark scheme	Additional guidance
12 (a)	10	B1	cao	May be shown on graph
(b)	30	M1	for using the graph to take one correct reading	
		A1	30 or ft from correct use of graph	
13	4 : 1 : 2	M1	for start to express the statements as a ratio eg 4 : 1, 1 : 4, 1 : 2 or 2 : 1 with clear and correct link to Azmol, Ryan, Kim OR as algebraic expressions, two of $4x$, x and $2x$ eg $4x : x$, $1x : 4x$, $1x : 2x$ or $2x : 1x$ with clear and correct link to Azmol, Ryan, Kim	Allow any equivalent ratio, integers only May be seen as part of an incorrect answer.
		A1	4 : 1 : 2 oe	May be seen as integer multiples of these algebraic expressions. Any letter may be used.
		(SCB1	3 integer numbers in correct ratio but no ratio notation, eg 4, 1, 2 or 20, 5, 10)	Accept 8 : 2 : 4 or equivalent ratios involving integers
14	shown	M1	for method to find angle ADC , eg $180 - 75 (= 105)$	Must be clear link to angle ADC , may be marked on diagram
		M1	for angle $BCD = 50$	Must be clear method/explanation shown. Angle marked on diagram is not sufficient.
		M1	for method to find angle ABC , eg $360 - 100 - 50 - "105"$	
		C1	(dep M3) for angles ADC , BCD and ABC correct and at least 2 appropriate reasons, eg vertically <u>opposite angles</u> are equal or <u>vertically opposite angles</u> are equal , <u>angles</u> on a straight <u>line</u> add to <u>180°</u> , <u>angles</u> in a <u>quadrilateral/kite</u> add up to <u>360°</u> ; <u>angles</u> at a <u>point</u> add up to <u>360°</u>	

Paper: 1MA1/1F				
Question	Answer	Mark	Mark scheme	Additional guidance
15 (a)	420	P1	starts process, eg $300 \div 5 (= 60)$ or $200 \div 2 (= 100)$ OR builds up ratio to at least 300 ml orange juice with one error	May be seen as “60” \times 7 “60” must come from correct method
		P1	complete process, eg “60” \times 5 + “60” \times 2 or 300 : 120	
		A1	cao	
(b)	explanation	C1	explains that it will have no effect with reason, eg because he only needs 120 ml of lemonade because he has no more orange juice to use	
16	No and explanation	C1	‘No’ and explanation with reference to multiplication or division eg No he’s incorrect as you would multiply the sides by a number rather than add	
17 (a)	32, 48, 24, 8, 37, 11	C1	starts to interpret information, eg 48 or 8 in correct place	Incorrect notation with “37” and “61” can earn the method mark but not the accuracy mark. Accept any equivalent fraction, decimal form 0.60(65...) or 0.61 or percentage form 60(.65...) % or 60% or 61%
		C1	for $80 - 48 (= 32)$ and “32” $- 8 (= 24)$	
		C1	completes frequency tree correctly SC: award C2 if all correct frequencies are shown as fractions of 80.	
(b)	$\frac{37}{61}$	M1	ft for $\frac{a}{\text{“61”}}$ with $a < \text{“61”}$ or $\frac{\text{“37”}}{b}$ with $b > \text{“37”}$	
		A1	ft from diagram in (a)	

Paper: 1MA1/1F				
Question	Answer	Mark	Mark scheme	Additional guidance
18	Jan's store (supported)	P1	process to reduce £5 by 20% (= £4) or increase 400 by 30% (= 520)	May work in pence throughout Accept any correct appropriate percentage process May use £/g or any other comparable values Do not award without correct comparable values and full working.
		P1	process to reduce £5 by 20% (= £4) and increase 400 by 30% (= 520)	
		P1	(dep P2) process to find comparable values, eg $400 \div "4"$ and $"520" \div 5$	
		C1	'Jan's store' fully supported by correct comparative values, eg 100 (g/£) and 104 (g/£)	
19	Shape drawn	B2	for shape with vertices at (4, -3), (5, -4), (5, -5), (4, -5)	Shape does not have to be shaded. Allow some tolerance on vertices as long as they are nearest to the desired points. This is shown by the orientation of the shape.
		(B1	for rotation of 180° about wrong centre)	
20	9	M1	for a correct first step, using the laws of indices to simplify eg 3^2 or. $3^{7+ -2}$ or 3^{7-3} or 3^{-2-3} OR for using exact values, eg. $2187 \times \frac{1}{9}$ (= 243) or $2187 \div 27$ (= 81) or $\frac{1}{27 \times 9}$ (= $\frac{1}{243}$)	
		A1	cao	
21 (a)	6 or -6	M1	for $12^2 + 2 \times -3 \times 18$ (= 36)	Terms may be partially evaluated. Only one value is required for full marks
		A1	for 6 or -6, accept ± 6	
(b)	$s = \frac{v^2 - u^2}{2a}$	M1	for subtracting u^2 from both sides or dividing all terms by $2a$ as the first step	Must see this step carried out, not just the intention shown
		A1	$s = \frac{v^2 - u^2}{2a}$ oe	

Paper: 1MA1/1F				
Question	Answer	Mark	Mark scheme	Additional guidance
22	No (supported)	<p>P1</p> <p>P1</p> <p>P1</p> <p>P1</p> <p>A1</p>	<p>for start to process, eg $2100 \times \frac{40}{100} (= 840)$ or $100 - 40 (= 60)$</p> <p>for process to find the 7 salesmen's share of bonus, eg $2100 - "840" (= 1260)$ or $2100 \times \frac{60}{100} (= 1260)$</p> <p>for process to find bonus amount each salesman gets eg $"1260" \div 7 (= 180)$ OR process to find the total bonus for all salesmen if shared equally, eg $\frac{2100}{10} \times 7 (= 1470)$</p> <p>for process to compare what a single salesman gets under each scheme, eg $"180" \times \frac{25}{100} (= 45)$ and $\frac{2100}{10} - "180" (= 30)$ or $"180" \times \frac{25}{100} (= 45)$ and $"180" + "45" (= 225)$ oe and $\frac{2100}{10} (= 210)$ or $(\frac{2100}{10} - "180") \div "180" \times 100 (= 16.6...)$</p> <p>OR process to compare what all salesmen gets under each scheme, eg $"1260" \times \frac{25}{100} (= 315)$ and $"1470" - "1260" (= 210)$ or $"1260" \times \frac{25}{100} (= 315)$ and $"1260" + "315" (= 1575)$ oe and $"1470"$ or $(\frac{2100}{10} - "1260") \div "1260" \times 100 (= 16.6...)$</p> <p>'No' supported by correct figures, eg 45 and 30, 225 and 210, 315 and 210 or 1575 and 1470 or 16.6...(% and 25%)</p>	<p>May compare bonus shares of a single salesman or total bonus share for all 7 salesmen.</p> <p>Do not award unless correct figures have been shown to support a statement made that the salesman was not correct.</p>

Paper: 1MA1/1F				
Question	Answer	Mark	Mark scheme	Additional guidance
23 (a)	200	M1	for $120 \times 5 \div 3$ oe	Any statement referring to the same amount of water flowing from each tap is acceptable.
		A1	cao	
(b)	statement	C1	<p>Statement that each tap fills at the same rate or that the rate does not change over time</p> <p>Examples</p> <p>Acceptable responses:</p> <p>Taps are running at the same speed</p> <p>They (clearly referring to taps) all fill the pool with the same volume of water</p> <p>The amount of water is the same in the same time (again referring to taps)</p> <p>Each tap is doing a fifth of the filling</p> <p>That all taps take equal time to fill the pool</p> <p>All taps produce the same amount of water</p> <p>That the water flow stays at the same rate over the whole time.</p> <p>Non acceptable responses</p> <p>It will take more time because there are less taps</p> <p>The less taps used the longer it takes to fill the pool</p> <p>That 1 tap can take up to 24 mins each</p> <p>3 taps will take longer to fill the pool</p>	
24 (a)	16 to 20	P1	<p>for using time = $\frac{\text{distance}}{\text{speed}}$, eg $\frac{1}{200}$ or $\frac{1}{213}$</p> <p>or for 1 hour = 60×60 (= 3600) seconds</p>	Calculation could be done in stages.
		P1	complete process, eg $\frac{1}{200} \times 60 \times 60$ oe or $\frac{1}{213} \times 60 \times 60$	
		A1	for answer in range 16 to 20	
(b)	decision with reason	C1	<p>(dep on correct use of time = $\frac{\text{distance}}{\text{speed}}$) for reason related to their response to part(a),</p> <p>eg overestimate as speed rounded down</p>	

Paper: 1MA1/1F				
Question	Answer	Mark	Mark scheme	Additional guidance
25	$x = 4.5, y = -1.5$	M1 M1 A1	correct process to eliminate one variable (condone one arithmetic error) (dep) for substituting found value in one of the equations OR correct process after starting again (condone one arithmetic error) for $x = 4.5, y = -1.5$ oe	Fractions do not need to be in simplest form
26	shown	C1 C1 C1 C1	for method to find area of semicircle, eg $\pi \times 10^2 \div 2 (= 50\pi)$ for method to find area of quarter circle, for $\pi \times 20^2 \div 4 (= 100\pi)$ for a complete method to find area shaded and area of square, eg $\pi \times 20^2 \div 4 - \pi \times 10^2 \div 2$ and 20×20 fully correct working leading to $\frac{\pi}{8}$	Can award first 3 marks if a value for π is used Working out to find the area of the shaded region must be shown
27	(a) $\frac{7}{10}, \frac{4}{9}, \frac{5}{9}, \frac{4}{9}$ (b) $\frac{15}{90}$	B2 (B1 M1 A1	for all probabilities correct (oe) for 2 or 3 correct) for $\frac{3}{10} \times \frac{5}{9}$ oe $\frac{15}{90}$ oe	Accept any equivalent fraction, decimal form 0.16(6...) or 0.17 or percentage form 16(.6...) % or 17%

Paper: 1MA1/1F				
Question	Answer	Mark	Mark scheme	Additional guidance
28	24	P1	starts process, eg $x + 11x = 180$ or $180 \div 12 (= 15)$ or interior angle + exterior angle = 180 oe	
		P1	complete process to find number of sides, eg $360 \div (180 \div 12)$	
		A1	cao	

Modifications to the mark scheme for Modified Large Print (MLP) papers. Paper 1F.

Only mark scheme amendments are shown where the enlargement or modification of the paper requires a change in the mark scheme.

The following tolerances should be accepted on marking MLP papers, unless otherwise stated below:

Angles: $\pm 5^\circ$

Measurements of length: ± 5 mm

PAPER: 1MA1_1F			
Question		Modification	Mark scheme notes
1		Wording ‘five’ added	Standard mark scheme
3		Wording ‘seven’ added	Standard mark scheme
7		Diagram enlarged. Key moved above and to the left of the diagram. Squares divided into four sections. Wording added ‘There is one row to complete.’	Standard mark scheme
8		Diagram enlarged. Wording added ‘It shows a point A, marked on a grid.’ Cross changed to solid dot. In part (b) Wording ‘with a cross (x)’ removed.	Standard mark scheme
11		Wording ‘some’ removed and changed to ‘five’	Standard mark scheme

PAPER: 1MA1_1F			
Question		Modification	Mark scheme notes
12		Diagram enlarged. Right axis labelled. Graph line made thicker. Axes labels moved to the left of the horizontal axis and above the vertical axis.	Standard mark scheme but additional tolerance is needed in taking readings from the graph; allow if the intention is clear.
14		Diagram enlarged. Wording added 'Three angles are marked on the diagram: 50°, 75°, 100°.' Angles moved outside of angle arcs and angle arcs made smaller.	Standard mark scheme
15		Frame around information removed	Standard mark scheme
16		Diagrams enlarged. Diagram labels moved above the shapes and to the left-hand side of the shapes. Braille only – will label rectangles A and B and give the shape measurements.	Standard mark scheme
17		Wording added 'It shows an incomplete frequency tree.' Part (a): Wording added 'There are six spaces to fill.' Diagram enlarged. Braille only – will label answer spaces as shown below: <div style="margin-left: 40px;"> (iii) (i) (iv) 80 (v) (ii) (vi) </div>	Standard mark scheme
18		3D boxes removed. <div style="margin-left: 100px;"> Wording 'Box' added after 'Food Mart'. Wording 'Box' added after 'Jan's Store'. </div>	Standard mark scheme

PAPER: 1MA1_1F			
Question		Modification	Mark scheme notes
19		Wording added ‘It shows shape A on a grid. A cut out shape is available if you wish to use it.’ Diagram enlarged. Wording ‘A’ deleted from inside the shape. Wording ‘shape A’ added above the shape. Shading has been changed to dotty shading.	Standard mark scheme
26		Diagram enlarged. Shading has been changed to dotty shading. DC labelled 20 cm.	Standard mark scheme
27		Wording added ‘It shows an incomplete probability tree diagram.’ Part (a): Diagram enlarged. Braille only – will label answer spaces as shown below. Wording added ‘There are four spaces to fill.’ <div>5/9 3/10 (ii) (ii) (i) (iv)</div>	Standard mark scheme
